

BRINGING HAWAI'I ONE STEP CLOSER TO CLEAN ENERGY SELF SUFFICIENCY

100%

RENEWABLE ENERGY

The Maui Electric Company has invited Innergex Renewables USA LLC to participate in its effort to achieve 100% renewable energy by 2045.

Canada-based Innergex has a 28-year history of developing and operating successful, and environmentally responsible renewable energy projects around the world. Our core company values include integrity, responsibility, collaboration and transparency.

Innergex is committed to working with local contractors, consultants and businesses in developing energy projects. We actively support local organizations, associations, legacy projects and events in the communities where we operate. We pride ourselves on being good neighbors.

Our proposed 15 MW Solar Project plus 60 MWh battery energy storage system at Ulupalakua Ranch, mauka of Piilani highway in south Maui will power about 7,300 Maui households with clean, renewable energy. Daylight battery storage will provide reliable power at night and during emergencies, when it is most needed.

Over the coming months, we will continue to conduct technical, environmental, cultural and archeological studies to ensure preservation of storied and sacred places on Parker Ranch and in the communities surrounding this project.
