

**News Release  
For Immediate Distribution****INNERGEX ANNOUNCES COMMERCIAL OPERATION OF  
TWO WIND FARMS IN FRANCE**

- Contribution to the Corporation's annual revenues and Adjusted EBITDA of approximately €15.1 million (or C\$22.3 million) and €11.7 million (or C\$17.3 million), respectively
- 

**LONGUEUIL, Quebec, May 26, 2017** – Innergex Renewable Energy Inc. (TSX: INE) ("Innergex" or the "Corporation") announces that the Vaite (38.9 MW) and Rougemont-1 (36.1 MW) wind farms, which were acquired this week, have begun commercial operation. Innergex has a 69.55% interest in the wind farms and Desjardins Group Pension Plan owns the remaining 30.45%.

"Following the commissioning of these two projects, we now have 12 wind farms in operation in France, just over one year after our first acquisition," stated Michel Letellier, President and Chief Executive Officer of the Corporation. "We are very pleased with our track record and are committed to continuing our international growth."

Vaite and Rougemont-1's average annual production is estimated to reach 93,140 MWh and 84,720 MWh respectively, enough to power more than 37,300 French households. In its first full year of operation, it is expected to generate revenues and Adjusted EBITDA of approximately €15.1 million (or C\$22.3 million) and €11.7 million (or C\$17.3 million), respectively. All the electricity produced by these wind farms will be sold under power purchase agreements (PPAs) at fixed prices of which a portion is adjusted according to inflation indexes, for an initial term of 15 years, with Electricité de France (EDF).

***About Desjardins Group Pension Plan***

The mission of the Desjardins Group Pension Plan, acting through its Retirement Committee, is to provide a defined benefit pension plan to more than 50,000 beneficiaries. With \$11.4 billion in net assets under management, it ranks among the top 10 private pension plans in Canada.

***About Innergex Renewable Energy Inc.***

The Corporation develops, owns and operates run-of-river hydroelectric facilities, wind farms and solar photovoltaic farms and carries out its operations in Quebec, Ontario and British Columbia, Canada, France and Idaho, USA. Its portfolio of assets currently consists of: (i) interests in 51 operating facilities with an aggregate net installed capacity of 1,063 MW (gross 1,758 MW), including 31 hydroelectric facilities, 19 wind farms and one solar farm; (ii) interests in one project under construction with a net installed capacity of 31 MW (gross 45 MW), for which a power purchase agreement has been secured; and (iii) prospective projects with an aggregate net capacity totalling 3,560 MW (gross 3,940 MW). Innergex Renewable Energy Inc. is rated BBB- by S&P.

The Corporation's strategy for building shareholder value is to develop or acquire high-quality facilities that generate sustainable cash flows and provide an attractive risk-adjusted return on invested capital and to distribute a stable dividend.

**Non-IFRS measures disclaimer**

Readers are cautioned that Adjusted EBITDA is not a measure recognized by IFRS and has no standardized meaning prescribed by it, and therefore may not be comparable to those presented by other issuers. Innergex believes that this indicator is important, as it provides management and the reader with additional information about its cash generation capabilities and facilitates the comparison of results over different periods. References in this press release to "Adjusted EBITDA" are to revenues less operating expenses, general and administrative expenses and prospective project expenses. Readers are cautioned that Adjusted EBITDA should not be construed as an alternative to net earnings as determined in accordance with IFRS.

**Forward-Looking Information Disclaimer**

In order to inform readers of the Corporation's future prospects, this press release contains forward-looking information within the meaning of applicable securities laws ("Forward-Looking Information"). Forward-Looking Information can generally be identified by the use of words such as "projected", "potential", "expect", "will", "should", "estimate", "forecasts", "intends", or other comparable terminology that states that certain events will or will not occur. It represents the estimates and expectations of the Corporation relating to future results and developments as of the date of this press release. It includes future-oriented financial information, such as expected production, revenues and Adjusted EBITDA, to inform readers of the potential financial impact of the Vaite and Rougemont-1 wind farms. Such information may not be appropriate for other purposes.

Forward-Looking Information in this press release is based on certain key expectations and assumptions made by the Corporation. The following table outlines Forward-Looking Information contained in this press release, the principal assumptions used to derive this information and the principal risks and uncertainties that could cause actual results to differ materially from this information.

**Material risks and uncertainties**

The material risks and uncertainties that may cause actual results and developments to be materially different from current expressed Forward-Looking Information are referred to in the Corporation's Annual Information Form in the "Risk Factors" section and include, without limitation: the ability of the Corporation to execute its strategy for building shareholder value; its ability to raise additional capital and the state of capital markets; liquidity risks related to derivative financial instruments; variability in hydrology, wind regimes and solar irradiation; delays and cost overruns in the design and construction of projects; uncertainty surrounding the development of new facilities; variability of installation performance and related penalties; and the ability to secure new power purchase agreements or to renew existing ones.

Although the Corporation believes that the expectations and assumptions on which Forward-Looking Information is based are reasonable, readers of this press release are cautioned not to rely unduly on this Forward-Looking Information since no assurance can be given that they will prove to be correct. The Corporation does not undertake any obligation to update or revise any Forward-Looking Information, whether as a result of events or circumstances occurring after the date of this press release, unless so required by legislation.

| Principal Assumptions   | Principal Risks and Uncertainties  |
|---|--|
| <p><b>Expected production</b><br/>For each facility, the Corporation determines a long-term average annual level of electricity production ("LTA") over the expected life of the facility, based on engineers' studies that take into consideration a number of important factors: for hydroelectricity, the historically observed flows of the river, the operating head, the technology employed and the reserved aesthetic and ecological flows. Other factors taken into account include, without limitation, site topography, installed capacity, energy losses, operational features and maintenance. Although production will fluctuate from year to year, over an extended period it should approach the estimated long-term average.</p> | <p>Improper assessment of water resources and associated electricity production</p> <p>Variability in hydrology</p> <p>Equipment failure or unexpected operations and maintenance activity</p> <p>Natural disaster</p>             |
| <p><b>Projected Revenues</b><br/>For each facility, expected annual revenues are estimated by multiplying the LTA by a price for electricity stipulated in the power purchase agreement secured with a public utility or other creditworthy counterparty. These agreements stipulate a base price and, in some cases, a price adjustment depending on the month, day and hour of delivery. In most cases, power purchase agreements also contain an annual inflation adjustment based on a portion of the Consumer Price Index.</p>   | <p>Production levels below the LTA caused mainly by the risks and uncertainties mentioned above</p> <p>Unexpected seasonal variability in the production and delivery of electricity</p> <p>Lower-than-expected inflation rate</p> |
| <p><b>Projected Adjusted EBITDA</b><br/>For each facility, the Corporation estimates annual operating earnings by subtracting from the estimated revenues the budgeted annual operating costs,</p>  | <p>Variability of facility performance and related penalties</p>   |

|  |   |
|--|---|
| <p>which consist primarily of operators' salaries, insurance premiums, operations and maintenance expenditures, property taxes and royalties; these are predictable and relatively fixed, varying mainly with inflation (except for maintenance expenditures).</p> | <p>Changes to water and land rental expenses</p> <p>Unexpected maintenance expenditures</p> <p>Changes in the purchase price of electricity upon renewal of a PPA</p> |
|--|---|
