

East Toba River and Montrose Creek Run-of-River Power Plants**Environmental Management**

The East Toba River and Montrose Creek Run-of-River Power Plants are operated in a manner that respects and protects the environment in which they operate. The facility operations are conducted in accordance with an Environmental Management System (EMS) to ensure sound environmental management and compliance with regulatory and permit requirements.

In addition to the EMS, the following monitoring program is planned for 2022:

- Water Compliance Monitoring – monitoring the instream flow requirement, maximum diversion and ramping (start-up and shut down) rates.
