JOB POSTING #WIN179

POSITION: SITE MANAGER – OPERATIONS, WIND ENERGY FOARD COUNTY, TX [USA]

COMPANY PROFILE

Innergex Renewable Energy Inc. is a global player with an extensive and growing portfolio of assets in Canada, the United States, France, Chile and Iceland. The Company develops, owns, acquires and operates run-of-river hydroelectric facilities, wind farms, solar farms and geothermal plants exclusively producing renewable energy.

Sustainable development producing positive social, environmental and economic results guides our actions. We are not only proud of the work we do, but also of the way we do it. Our many accomplishments and continued successes are made possible by our outstanding team of employees.

Innergex, a publicly traded company, has offices in Longueuil, Vancouver, Lyon and San Diego.

The chosen candidate will be based at our Foard wind farm in Foard County, TX.

ROLE AND RESPONSIBILITIES

Reporting to the Manager – Regional Operations, the Site Manager – Operations, Wind Energy will manage the day-to-day operations of the wind farm in collaboration with the wind turbine OEM and O&M contractor. This position will be the main Owner point of contact for operations activity at the wind farm.

The main responsibilities are as follow:

- Ensure all on-site activities are conducted in accordance with applicable safety standards;
- Manage all operations and maintenance activities for balance-of-plant (BOP) assets within established operating guidelines;
- Identify and engage contractors for the delivery of BOP maintenance;
- Ensure that BOP maintenance is conducted in accordance with NERC standards;
- Complete or assist with NERC compliance reports for Owner and liaise with the internal compliance manager as required;
- Ensure that wind turbines are operated and maintained in accordance with OEM and applicable industry standards;
- Ensure that turbine, civil and other issues are monitored, tracked and accurately reported;
- Ensure compliance with site environmental regulations pertaining to hazardous waste, oil spill prevention, avian studies and wildlife conservation;
- Oversee the facility's operations and ensure that maintenance-related activities are aligned with the performance requirements outlined in related contracts;
- Liaise with suppliers to ensure that any identified warranty deficiencies are rectified appropriately;
- Produce daily, weekly, monthly and annual reports in accordance with operational, safety, regulatory and environmental performance requirements;
- Engage appropriate internal and external resources to diagnose and rectify performance and reliability issues;
- Represent the company as needed with grid and off-taker entities and in landowner and community relations;
- Work closely with vendors and other third parties as needed;

Please note that only candidates selected for an interview will be contacted.
The masculine is used in this publication without prejudice for the sake of conciseness.

- Maximize performance and ensure value retention for the facility;
- Conduct and report on periodic meetings with contractors and partners;
- Periodically cooperate with other area Site Managers for vacation coverage and assistance, as needed;
- Additional duties as required.

PROFILE

- Strong problem-solving skills;
- Ability to be self-motivated and work with minimal supervision;
- Ability to multi-task in a complex and dynamic environment;
- Excellent team player with strong interpersonal skills;
- Excellent communication skills, both written and verbal;
- Be in good physical condition, able to carry out physical tasks and work outdoors in adverse weather conditions.

PROFESSIONAL REQUIREMENTS

- Associate or Bachelor's degree in a related field, or equivalent experience/training in power generation;
- Wind turbine technician designation or equivalent trade experience;
- Relevant supervisory experience;
- Experience working with multiple stakeholders;
- Experience with operations/maintenance of High Voltage systems would be considered an asset;
- Strong knowledge of Microsoft Office software;
- Have a valid driver's license in good standing.
